  Phaung Daw Oo Monastic Education High School

About Me

A dedicated computer science student with experience in web development and database management. Skilled in ReactJS, Node.js, and MySQL, with a focus on creating functional and user-friendly applications. Passionate about learning new technologies and solving problems through innovative solutions

Professional Experience

- Phaung Daw Oo International University (2021–Current)

  Assist with various administrative and technical tasks to support the university's operations. Actively contribute to maintaining the university's online presence and technical infrastructure.

- Thone Htet Monastic School, Yangon (2019–2020)

  Taught Mathematics to students, focusing on building their foundational skills and improving problem-solving abilities.

Achievements

- Impactful Teaching
- Successfully helped students improve their Math skills and fostered a greater understanding of key mathematical concepts during my time as a volunteer teacher at Thone Htet Monastic School.
- Developed engaging and effective lesson plans, contributing to the academic progress of students.
- Academic Excellence
- Maintained consistent academic performance in the Bachelor of Information Technology program, demonstrating strong problem-solving and technical skills.
- Recognized for excellence in coursework related to programming and database management.
- Technical Project Development
- Led the development of a fully functional online library project as part of university coursework, implementing key features like user authentication and database integration.
- Contributed to university team projects that improved IT infrastructure and online services.
- Volunteer Contributions
- Actively volunteered at Phaung Daw Oo International University, providing technical support and assisting with administrative tasks to improve efficiency.
- Played a key role in supporting university events and workshops, contributing to student engagement and learning.
